

THE DRY TEXT CO.

# The brand kit.

A content, marketing, advertising, branding and website agency from Ahmedabad.  
Six documents and a folder of files.

Everything here is taken from the website as built, not from a moodboard. If the site and this kit ever disagree, the site is wrong and should be corrected to match, or this kit should be reissued. Nothing else is a source of truth.

The idea underneath all of it is a red pen on paper. The brand is a draft being edited in public: the black layer says what is true, the red layer says what we think about it. Every piece of design here is either paper, ink, or a mark made on top.

*the jokes are in the red. the meaning is in the black.*

## WHAT'S IN THE FOLDER

# Six documents, five folders.

| FILE                    | WHAT IT HOLDS                                                      |
|-------------------------|--------------------------------------------------------------------|
| 01 Logo                 | The caret mark: what it is, how to place it, what not to do.       |
| 02 Wordmark             | The two versions of the name, and when each one is used.           |
| 03 Colour               | Every colour on the site, with its job.                            |
| 04 Type                 | Four typefaces, the weights, and the size scale.                   |
| 05 Voice                | How the writing sounds, and the words we never use.                |
| 06 Interface and motion | Layout, components, movement, Dry mode, accessibility.             |
| Assets/Logo             | The mark as SVG and PNG, on paper, on ink, on red, and on its own. |
| Assets/Wordmark         | Both wordmarks as SVG (real outlines), PDF and transparent PNG.    |
| Assets/Colour           | tokens.css and tokens.json, ready to paste into a project.         |
| Assets/Fonts            | The four typefaces, with their open licences.                      |
| Assets/Cursors          | The pencil, eraser and pen cursors as SVG.                         |

**Fonts.** All four typefaces are open licence (SIL Open Font License). The licence text sits next to the files: keep it with them if you pass them on. They can be installed on any machine, used in print, and embedded in PDFs at no cost.

## 01 • THE MARK

# A proofreader's caret.

The logo is a single editing mark: red on paper, drawn in one movement.

**What it is.** The caret is the mark an editor makes under a line to say “something goes in here”. It is the oldest instruction in editing, and it is the whole business in one stroke: we are the people who write what goes in the gap.

**How it is drawn.** One stroke on a 32×32 grid, from (8, 23) to (16, 9) to (24, 23), 4.2 units thick, round cap and round join. The tile is a 32×32 square with a 7-unit corner radius.

**It is never a letter.** Not an A, not a lambda, not a roof. If someone reads it as a letter, the stroke is too thin or the corners are too round.

*one stroke. one job.*

## 01 • VERSIONS

# Four versions, and that is all.

*the corners are round. the mark is not.*

RED ON PAPER • DEFAULT

PAPER ON INK • DARK  
BACKGROUNDS

PAPER ON RED • STICKERS, TAPE

CARET ALONE • WATERMARKS,  
EMBOSSING

## CLEAR SPACE

Keep a margin equal to the height of the caret (14 of the 32 units, so 44% of the tile) on all four sides. Nothing sits inside that margin: no type, no rules, no photo edges.

## MINIMUM SIZE

16 px as a favicon, 24 px anywhere else on screen, 8 mm in print. Below that the caret closes up and reads as a blob, so use the caret alone instead of the tile.

## 01 • RULES

# What the mark will and won't do.

## DO

- ✓ Put it on paper, ink or red, in the colours given.
- ✓ Use the square version for profile pictures: Instagram, LinkedIn and WhatsApp crop it to a circle themselves.
- ✓ Use the SVG wherever the medium allows it, and the 2048 px PNG when it does not.
- ✓ Let it sit alone. It does not need the name next to it.
- ✓ Emboss, deboss or foil the caret alone on paper goods.

## FILES

Assets/Logo/mark-ink-on-paper.svg • mark-square.svg • mark-on-ink.svg  
mark-on-red.svg • mark-caret-only.svg • mark-caret-only-ink.svg •  
favicon.svg

mark-1024.png • mark-2048.png • mark-4096.png • mark-square-2048.png  
mark-on-ink-2048.png • mark-on-red-2048.png • mark-caret-only-2048.png

## DON'T

- ✗ Rotate it, flip it, or stand it on a point.
- ✗ Fill the caret or add a second stroke inside it.
- ✗ Recolour it outside the palette, including gradients.
- ✗ Add shadows, glows, bevels or outlines.
- ✗ Stretch the tile into a rectangle, or change the corner radius.
- ✗ Lay it over a photograph with detail behind the caret.

## WHERE IT ALREADY LIVES

The browser tab of [thedrytextco.in](https://thedrytextco.in), the link preview image, and the profile pictures. The website itself never shows the mark in the page: the name does that job.

## 02 • THE NAME

# Two versions of the same name.

The name is set, not drawn. The marks on it are the logo doing its job in public.

EDITED • THE LANDING PAGE

*Cheesy*  
The ~~Dry~~ Text Co.

DRY • EVERYWHERE ELSE

The Dry Text Co.

## 02 • WHICH ONE, WHEN

# The edited one has to earn its space.

*if it has to be explained, use the dry one.*

## USE THE EDITED WORDMARK

- **On our own surfaces.**  
The website hero, deck covers, the studio's own posts, printed cards.
- **When it is at least 120 px / 40 mm wide.**  
Below that the handwriting turns to mush.
- **On paper or a pale ground.**  
Never on red: the marks disappear into it.

## CLEAR SPACE

A margin equal to the height of the capital T on all four sides. The circle around "Co." and the handwriting both sit inside the artwork already, so use the file's own edges, not the letters, when you measure.

## USE THE DRY WORDMARK

- **In client work.**  
Proposals, invoices, contracts, email signatures, anywhere the joke would be in the way.
- **Next to other logos.**  
Co-branding, sponsor rows, partner pages.
- **Small, or in one colour.**  
Stamps, embroidery, engraving, a single-colour print run.

## MINIMUM SIZE

Edited: 120 px wide on screen, 40 mm in print. Dry: 90 px wide on screen, 30 mm in print.

## 02 • HOW IT IS BUILT

# The marks are measured, not sketched.

PART

HOW IT IS MADE

|            |                                                                                                                                                                                     |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The name   | Newsreader, weight 500, optical size 72, letter-spacing -0.03em, all on one line.                                                                                                   |
| “Dry”      | The same setting, in grey #77767A, so the struck word recedes before the eye reaches the strike.                                                                                    |
| The strike | A rounded bar in red, 6% of the type size thick (never under 3 px), running 5% past the word at each end, tilted -4°, crossing at 55% of the line box.                              |
| “Cheesy”   | Kalam Bold in red at 0.56 of the type size, centred over the struck word, tilted -5°, sitting just above the cap line.                                                              |
| The circle | One hand-drawn stroke, 2.4 units on a 120×70 grid, stretched to 128% of the width and 122% of the height of “Co.”, so the loop is wider than it is tall and does not close cleanly. |
| On screen  | The strike draws in 0.52 s, the handwriting is revealed over 0.9 s, the circle is drawn last, 1.55 s in. In that order, always: the edit has to look like it is happening.          |

## FILES

Assets/Wordmark/wordmark-edited.svg • .pdf • -4000.png  
wordmark-dry.svg • .pdf • -4000.png • wordmark-dry-paper.svg

The SVGs carry real outlines, so they open anywhere with no font installed. The PDFs are vector and print-ready. The PNGs are 4000 px wide on transparent.

## DON'T

Retype the name in another typeface, or in Newsreader at another weight.  
Strike a different word, or circle a different one.  
Stack it over two lines.  
Put the edited version on red, on a photo, or in one colour.

## 03 • THE THREE

# Paper, ink, and one red pen.

Everything else in the palette is support. These three carry the brand.

## Paper

#FBFBF9 • rgb 251, 251, 249

The ground. Every page, every card, every deck starts here. Not white: paper.

## Ink

#16161A • rgb 22, 22, 26

All type, the rules, the buttons, the ID card bands. Reads as black without being black.

## Red pen

#D2232A • rgb 210, 35, 42

The edit. Margin notes, strike-throughs, circles, ticks, the brand's one loud colour.

## THE PROPORTION

Roughly 90 % paper, 9 % ink, 1 % red. The red is a pen, not a brand colour: it appears as a line, a circle, a tick or a short handwritten note, and almost never as a fill. If a layout has a red panel in it, something has gone wrong.

## BACKGROUNDS

Paper is the ground for everything. White (Sheet) is used only for things that are *on* the paper: cards, badges, the mail reader. Ink backgrounds are for small blocks, never whole pages.

## 03 • THE REST

# Nine more, each with one job.

**Sheet**

#FFFFFF • rgb 255, 255, 255

A sheet laid on the paper: cards, the outbox, the badges.

**Ink light**

#3A3A40 • rgb 58, 58, 64

Second-rank body text, captions inside cards.

**Grey**

#77767A • rgb 119, 118, 122

Labels, meta lines, struck-out words, anything the eye should pass over.

**Rule**

#E6E4DE • rgb 230, 228, 222

Hairlines and borders. Never for text.

**Margin pink**

#F2B8B8 • rgb 242, 184, 184

The ruled margin line down the page, and the left rule on quoted lines.

**Highlighter**

#FFE27A • rgb 255, 226, 122

Text selection and the occasional wash behind a note. Never a fill for large areas.

**Reader blue**

#2F5BD3 • rgb 47, 91, 211

Only for what the visitor writes themselves: their own margin notes, and focus rings on forms.

**Newsprint**

#F4F2EA • rgb 244, 242, 234

The newspaper-concept panel on the Work page.

**Newsprint rule**

#E0DCCC • rgb 224, 220, 204

Hairlines inside the newsprint panel.

03 • NUMBERS

Hex, RGB, CMYK, contrast.

| COLOUR         | HEX     | RGB           | CMYK (START HERE) | ON PAPER |
|----------------|---------|---------------|-------------------|----------|
| Paper          | #FBFBF9 | 251, 251, 249 | 0 / 0 / 1 / 2     | —        |
| Ink            | #16161A | 22, 22, 26    | 15 / 15 / 0 / 90  | 17.4:1   |
| Red pen        | #D2232A | 210, 35, 42   | 0 / 83 / 80 / 18  | 5.0:1    |
| Sheet          | #FFFFFF | 255, 255, 255 | 0 / 0 / 0 / 0     | 1.0:1    |
| Ink light      | #3A3A40 | 58, 58, 64    | 9 / 9 / 0 / 75    | 10.9:1   |
| Grey           | #77767A | 119, 118, 122 | 2 / 3 / 0 / 52    | 4.4:1    |
| Rule           | #E6E4DE | 230, 228, 222 | 0 / 1 / 3 / 10    | 1.2:1    |
| Margin pink    | #F2B8B8 | 242, 184, 184 | 0 / 24 / 24 / 5   | 1.6:1    |
| Highlighter    | #FFE27A | 255, 226, 122 | 0 / 11 / 52 / 0   | 1.2:1    |
| Reader blue    | #2F5BD3 | 47, 91, 211   | 78 / 57 / 0 / 17  | 5.7:1    |
| Newsprint      | #F4F2EA | 244, 242, 234 | 0 / 1 / 4 / 4     | 1.1:1    |
| Newsprint rule | #E0DCCC | 224, 220, 204 | 0 / 2 / 9 / 12    | 1.3:1    |

## 03 • READING THEM

# What the numbers are for.

## READING THE CONTRAST COLUMN

Ratio against Paper. Text needs 4.5:1 to be comfortable at body size, 3:1 at large sizes. Ink (17.4:1) and Ink light (10.9:1) are safe for anything. Red (5.0:1) is fine for the notes at 21 px and for headings, but never for small print. Grey (4.4:1) is for labels only. Margin pink and Highlighter are not text colours at any size.

## FILES

Assets/Colour/tokens.css • tokens.json

## PRINT

The CMYK values are a starting point from the screen colours, not a proof. For anything printed, hand the printer the HEX values and let them convert in the profile for the stock. The red should be checked on press: it is a warm, slightly orange red, and a cheap conversion turns it pink.

## CLIENT COLOURS

A client's logo always appears in the client's own colours, with no box behind it and no grey-out. Our palette never recolours someone else's mark.

## 04 • THE FOUR

# Four typefaces, four jobs.

Print serif for reading, a pen for the jokes, a mono for labels, and a Gujarati serif that has the letters the others don't.

## The Dry Text Co.

THE VOICE • 400 REGULAR, 500 MEDIUM, 400 ITALIC. OPTICAL SIZE AXIS 6-72.

*written for a reply, not for approval.*

THE PEN • 400 REGULAR, 700 BOLD. BOLD IS THE ONE WE USE.

### Newsreader

Headlines, body copy, the wordmark, anything that is being read rather than labelled.

A variable serif with an optical-size axis: at big sizes the letters get finer and tighter, which is why the name looks printed rather than typed. Set headlines at weight 500 with letter-spacing -0.02em to -0.03em.

### Kalam

Margin notes, the word “Cheesy” in the wordmark, the to-do list, the buttons that pretend to be handwritten.

Always red, always short, always slightly off-axis: notes sit at -1.5°. Never set more than two lines of it, and never use it for anything a client has to read carefully.

04 • THE FOUR

# The label and the Gujarati.

## DRY TEXT #14 • TO THE SOULED STORE

THE LABEL • 400 REGULAR, 500 MEDIUM.

## પોસાની પરબ

GUJARATI • 400 REGULAR, 500 MEDIUM.

## JetBrains Mono

Eyebrows, ID card lines, counts, buttons, dates, anything that behaves like a stamp or a form field.

Uppercase with 0.08em to 0.14em letter-spacing for labels. Lower case, no tracking, for buttons and counts.

## Noto Serif Gujarati

Every word of Gujarati, on the site and in client work.

Newsreader has no Gujarati letters, so Gujarati never gets set in it. Line-height 1.6, because the marks above and below need the room.

04 • SPECIMEN

# Newsreader, at the sizes that matter.

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

1234567890 & ? ! — “ ” ‘ ’ . @ #

*Italic is for titles of things and the occasional aside.*

PAGE TITLE • 92PX

## Meet the team.

LEDE • 28PX

Written in Ahmedabad. Read anywhere.

BODY • 19PX

If a sentence can lose a word, it will. Shorter is almost always truer, and the second version is usually the one worth sending.

## 04 • THE SCALE

# Sizes, leading, tracking.

*one size bigger is rarely the fix. one word shorter usually is.*

| ROLE            | FACE               | SIZE                                           | LEADING | TRACKING    | NOTES                                                                  |
|-----------------|--------------------|------------------------------------------------|---------|-------------|------------------------------------------------------------------------|
| Page title      | Newsreader 500     | clamp(46px, 7vw, 92px)                         | 1.0     | -0.03em     | One per page.                                                          |
| The name        | Newsreader 500     | clamp(34px, 12.6cqi, 104px)                    | 1.0     | -0.03em     | The wordmark in the hero. Sized against its container, not the screen. |
| Section heading | Newsreader 500     | clamp(32px, 4.2vw, 52px)                       | 1.05    | -0.02em     | Sentence case, ends with a full stop.                                  |
| Statement       | Newsreader 400     | clamp(24px, 2.9vw, 36px)                       | 1.3     | -0.01em     | The who-we-are paragraph. Max 30 characters per line.                  |
| Lede            | Newsreader 400     | clamp(22px, 2.4vw, 28px)                       | 1.35    | 0           | Under a page title. Max 34 characters per line.                        |
| Body            | Newsreader 400     | 19px, or clamp(20px, 2vw, 23px) for long reads | 1.55    | 0           | Max 60 characters per line.                                            |
| Margin note     | Kalam 700          | 21px (19px in tight places)                    | 1.25    | 0           | Red. Rotated -1.5°. Two lines maximum.                                 |
| Eyebrow         | JetBrains Mono 400 | 12px                                           | 1.2     | 0.12em      | Uppercase, grey, sits above a heading.                                 |
| Label / ID line | JetBrains Mono 400 | 10-11px                                        | 1.4     | 0.08-0.12em | Uppercase. Department tags, counts, badge lines.                       |
| Button          | JetBrains Mono 400 | 14px                                           | 1.0     | 0.02em      | Says exactly what happens next.                                        |

clamp() reads as: smallest on a phone, largest on a desktop, sliding with the screen in between. Keep the same three numbers if you rebuild any of this elsewhere.

## 04 • USING THEM

# On the web, in a deck, at a printer.

## ON THE WEB

```
<link rel="preconnect" href="https://fonts.googleapis.com">
<link rel="preconnect" href="https://fonts.gstatic.com" crossorigin>
<link rel="stylesheet" href="https://fonts.googleapis.com/css2?
family=Newsreader:ital,opsz,wght@0,6..72,400;0,6..72,500;1,6..72,400&famil
y=Kalam:wght@400;700&family=JetBrains+Mono:wght@400;500&family=Noto+Serif+
Gujarati:wght@400;500&display=swap">
```

Fallbacks, in order: Georgia and Times New Roman for Newsreader; Segoe Print and Bradley Hand for Kalam; the system mono for JetBrains Mono; Shruti for Gujarati.

## OFFLINE

The four families sit in Assets/Fonts as variable TrueType files, with their SIL Open Font Licence next to them. Install them, use them in Word, Canva, Figma or InDesign, embed them in a PDF, send them to a printer. Keep the licence file with the fonts if you pass them on, and don't sell the fonts themselves.

## RULES THAT MATTER MORE THAN THE SIZES

- 1 Never set body copy in Kalam. It is a pen, not a typeface for reading.
- 2 Mono is for labels, numbers and buttons. Not for sentences.
- 3 Gujarati is always Noto Serif Gujarati. Never let it fall back.
- 4 Headlines are sentence case and end with a full stop. Not title case.

## 05 • THE IDEA

# A draft, edited in public.

The brand is a piece of writing with the editing left visible. Everything follows from that.

- 1 If a sentence can lose a word, it will.**  
Cut it before the client does. Shorter is almost always truer.
- 2 Funny is a tool, not a costume.**  
The joke has to carry information. If it only decorates, it goes.
- 3 The brief is half the writing.**  
Ask the awkward question early. It is cheaper than a rewrite.
- 4 Write for a reply, not for approval.**  
Every piece should make the next step obvious and easy to take.
- 5 The black layer has to work alone.**  
Jokes live in the red layer. Take the red away and the meaning must survive: that is what Dry mode proves.

## THE DIAL

Cheek is set at 3 out of 5. Dry, deadpan, quietly rude about the industry, never zany, never a pun for the sake of it. The tone a good editor uses in the margin: honest, a bit tired, on your side.

## THE TWO LAYERS

Black type carries the meaning. Red carries the opinion. A reader who only reads the black gets the full story; a reader who reads both gets the company. Dry mode on the website is the test: switch it on, every red mark disappears, and nothing stops making sense.

*if the joke is load-bearing, it isn't a joke. it's a bug.*

## 05 • HABITS

# How the sentences behave.

## RULES OF THUMB

- Headlines are sentence case and end with a full stop. They are statements, not labels.
- Margin notes are lower case, under twelve words, and never contain the offer.
- Buttons say what happens: See the work, Hire the pen, Next mail.
- Numbers are written as numerals when they are facts (27 cold mails), as words when they are rhetoric (four people).
- No exclamation marks. The joke has to survive a full stop.
- Indian English, spelled British: colour, organise, programme.
- Say the price question plainly: priced per project, once we understand it.

## WORDS WE DON'T USE

|                           |                              |
|---------------------------|------------------------------|
| synergy                   | unlock your potential        |
| leverage (as a verb)      | curated                      |
| passionate about          | game-changing                |
| we're excited to announce | in today's fast-paced world  |
| revert back               | solutions provider           |
| kindly do the needful     | “!” at the end of a sentence |

Not because they are banned words, but because every one of them is a sentence that has stopped trying. If one turns up in a draft, there is a better, shorter, truer line underneath it.

## 05 • READY-MADE

# Copy you can paste.

*read it out loud. if you run out of breath, cut it.*

## 25 WORDS

The Dry Text Co. is a content, marketing, advertising, branding and website agency from Ahmedabad, writing for brands that would rather be read than skimmed.

## 50 WORDS

The Dry Text Co. is a creative agency from Ahmedabad. We write the words brands get judged by, and build the websites those words live on: brand copy, social, long-form, advertising and strategy. Four people, one red pen, and a habit of cutting every sentence that can lose a word.

## 100 WORDS

The Dry Text Co. is a content, marketing, advertising, branding and website agency from Ahmedabad, working with brands anywhere in the world. We write the words a brand gets judged by, and design and build the websites those words live on. That covers brand and web copy, social and marketing, advertising, long-form and content strategy. The work is done by four people, not a queue, so you always talk to the person actually writing it. We price per project, once we understand it. And we keep a red pen on everything, including our own drafts, because the second version is usually the one worth sending.

## TAGLINES

Don't go by the name, cuz we cheesy.

The house line. Use it where the audience already knows the name.

A content-writing agency from Ahmedabad, for brands anywhere in the world that would rather be read than skimmed.

The explaining line. Use it first, everywhere else.

06 · THE PAGE

# A notebook with a margin.

Paper down the middle, a red rule, and the notes written in the margin beside it.

LAYOUT

|                 |                                                                 |
|-----------------|-----------------------------------------------------------------|
| Page width      | max 1240px                                                      |
| Side padding    | clamp(20px, 5vw, 64px)                                          |
| Margin column   | clamp(200px, 22vw, 280px)                                       |
| Column gap      | clamp(32px, 4.5vw, 64px)                                        |
| The margin rule | 1px, Margin pink, full height                                   |
| Corner radius   | 4px buttons · 8px cards · 12px badges                           |
| Hairlines       | 1px Rule · 3px Ink under section heads                          |
| Phone           | one column under 760px; the margin notes fold in under the text |

THE CURSORS

A pencil everywhere, its eraser end over anything crossed out, a red pen over the hire links. 32×32, hotspot at the tip. They are part of the joke: the visitor is holding the pen too.

## 06 • PARTS

# The pieces the pages are built from.

*a card is a card. not everything is a card.*

| PART             | HOW IT IS MADE                                                                            | WHERE IT GOES                                                           |
|------------------|-------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|
| Button           | Ink fill, paper text, JetBrains Mono 14px, 17px / 22px padding, 4px radius.               | Primary actions. One per view.                                          |
| Ghost button     | Same size, paper fill, 1px ink border.                                                    | Secondary actions: Previous, Back.                                      |
| Pen link         | Kalam 700 red, wavy red underline 1.5px, 7px offset.                                      | The playful action: “Hire the pen”.                                     |
| Margin note      | Kalam 700 red 21px, rotated -1.5°, in the right-hand margin column.                       | Our commentary. Never load-bearing information.                         |
| Reader note      | The same slot, in Reader blue, with a dotted rule under it.                               | What a visitor writes on our page. Stored in their browser, never ours. |
| Staff badge      | Sheet card, ink band, square photo, serif role, mono ID line, department tag, barcode.    | The team. Real job in the tag, joke in the title.                       |
| Index and reader | A list of pieces on the left, the piece itself on the right, arrow keys to move.          | Any chapter with more than five pieces.                                 |
| Client logo      | The client’s own colours, no box, no grey-out, sized by visual weight rather than height. | Proof, not decoration.                                                  |

## 06 • MOVEMENT

# Nothing moves unless it is showing an edit.

| WHAT          | DURATION                                | EASING                       | HOW IT READS                                                                     |
|---------------|-----------------------------------------|------------------------------|----------------------------------------------------------------------------------|
| The strike    | 0.52s                                   | cubic-bezier(.65, 0, .35, 1) | A line drawn left to right through a word, as if by hand.                        |
| The write-in  | 0.9s, 0.6s after the strike             | cubic-bezier(.2, .7, .2, 1)  | The pen word appears left to right, revealed through a clip, never faded in.     |
| The circle    | 0.7s, 1.55s in                          | cubic-bezier(.65, 0, .35, 1) | Drawn as one stroke around the word, slightly overshooting where it started.     |
| Page change   | 150ms out, 420ms in, 560ms title reveal | cubic-bezier(.2, .7, .2, 1)  | The open page lifts and drops away, the next slides up, its heading is wiped in. |
| Note inking   | 0.55s                                   | ease                         | Margin notes fade and rise 6px as they scroll into view.                         |
| Client ticker | 40s, endless                            | linear                       | Logos move left to right. Pauses on hover.                                       |
| Dry mode      | measured, then glided                   | cubic-bezier(.2, .7, .2, 1)  | Jokes evaporate, then everything left glides to its new position. Nothing jumps. |

## THE RULE

Every animation on the site is a hand doing something: striking, writing, circling, ticking, turning a page. There is no sliding in for the sake of it, no parallax, no fade-ups on scroll except the notes inking in. If a movement cannot be explained as a pen or a page, it does not belong.

## RESPECTING PEOPLE WHO DON'T WANT IT

When a visitor has reduced motion turned on, every animation is switched off and everything appears in its final state. The opening sequence is skipped entirely. Nothing is lost: the site is written to work still.

## 06 • DRY MODE

# The whole brand, with the jokes removed.

**What it is.** A switch in the top bar. On, and every red mark, handwritten note, strike-through and joke heading evaporates; the layout then glides to close the gaps, holding the line the reader was on. What is left is the same site, said plainly.

**Why it exists.** Some people arrive in a hurry, and some arrive to check whether a funny agency can be serious. It answers both without an argument. It is also the test every new piece of copy has to pass.

**Building new sections.** Anything that is a joke gets marked as such so it can leave. Anything a client needs (a service, a price, a fact, a client's name) never carries a joke as its only wording. A visitor's own notes stay in both modes: they are not ours to switch off.

*dry mode on. the jokes have left the building.*

## ACCESSIBILITY, KEPT

- Focus ring: 2px red, 3px offset, on everything reachable by keyboard.
- The chapters and the mail readers work with arrow keys.
- Every photograph and logo has a text description.
- Colour is never the only signal: a strike-through is also grey, a current item is also underlined.
- Reduced motion is honoured everywhere, including the opening.

## META AND SHARING
